

# We Are Ready TO CARE FOR YOU

Do not delay emergency or routine care. We have the precautions in place to take care of you and keep everyone safe.

In order to ensure the safety of both our patients and team members at our care sites, patients will experience some differences during their visit.

## These safety features include:

- A requirement that everyone wears a face covering when coming to any Beebe care site
- Plexiglas barriers at registration areas
- Visual markers on the floors and/or other areas to remind patients to maintain 6 foot separation
- COVID-19 symptom screening and testing process prior to surgery
- Appointments are required for all lab and imaging tests to help maintain physical distancing and provide for your safety
- Visitor restrictions are still in effect; however, special circumstances do allow for visitation at the hospital
- Waiting room modification and car-based registration and waiting in some cases

## To schedule appointments:

- |                     |  |
|---------------------|--|
| <b>302-645-3332</b> | <b>Make an appointment with a Primary Care Physician</b> |
| <b>302-645-3278</b> | <b>Lab or Imaging (must have an order)</b>               |
| <b>302-645-3933</b> | <b>Physical Rehabilitation (must have an order)</b>      |
| <b>302-645-3200</b> | <b>COVID-19 screening line</b>                           |

We have always provided a safe environment to come and receive care in person, and Beebe has re-emerged from this pandemic stronger. The pandemic has forced us to take another look at the way we do certain things and as a result we have innovated in many exciting ways.

Some of those ways include:

- The adoption of telemedicine at all Beebe Medical Group practices, to allow for another way to see your provider. In addition to in-person visits, video and phone visits are now an option.
- A COVID Positive Care Center, for patients who require in-person care as well as lab and imaging appointments related to the virus. This keeps a designated area for COVID patients to receive care they need while keeping the community safe to go to their appointments.

All patients must have an appointment prior to arriving at an outpatient location (NOT including Walk-In and Emergency Care). Everyone must come to their appointment with a face covering on, for everyone's safety.
