

Lower Extremity Orthopaedic Care

A Skilled Approach to Hip, Knee, Ankle, and Foot Surgery

At Beebe Healthcare, the Orthopaedic Services Team uses advanced technology and the latest surgical techniques to relieve hip, knee, ankle, and foot pain. From diagnosis through treatment, Beebe's orthopaedic specialists have the patient's best interests in mind when creating an individualized plan for treatment.

Beebe has expertise in advanced imaging, minimally invasive procedures, and faster recovery times to improve the patient experience.

The Orthopaedic Services program at Beebe specializes in the prevention, diagnosis, and treatment of disorders of the bones, joints, ligaments, tendons, muscles, and nerves (musculoskeletal system). Subspecialties within the department include adult reconstruction, pediatrics, sports, trauma, spine, foot, hand, shoulder, elbow, and oncology.

PROVEN POSITIVE OUTCOMES FOR HIP REPLACEMENT SURGERY

If you are experiencing hip pain and the pain is preventing you from doing the things you enjoy, or simple activities like getting up from a chair, climbing stairs, or getting dressed are becoming more difficult, total hip replacement surgery may be a possible treatment option. Total hip replacements replace damaged joints and are effective in eliminating or reducing pain and increasing mobility.

KNEE SURGERY

Our physicians and staff provide our patients with the most up-to-date, highest-level orthopaedic care. We specialize in a wide range of bone, muscle, and joint injuries and diseases including:

- Adult joint replacements and revisions
- Sports injuries and fracture care
- General orthopaedic care

Beebe Lower Extremity Orthopaedic Surgeons

Hip & Knee Surgeons

CARROLL, DO, EDMUND, III

Board Certified in Orthopaedic Surgery; Fellowship Trained in Adult Reconstruction, Hip and Knee Replacement Surgery

Millsboro: Phone: (302) 231-1152 • Fax: (302) 945-3077

Additional surgeons listed on the back.

FOOT AND ANKLE SURGERY

Ankle pain can be treated in many ways. Non-surgical treatment options include specially made shoes and shoe inserts, ankle braces, medications, and injections. Some surgical options also are available when other treatments do not help. Those include resurfacing of the bones and fusing the bones (arthrodesis).

Ankle replacement surgery replaces damaged bone and cartilage. Artificial parts (prosthetics) are used. There are different types of ankle replacement surgeries. The procedure can be an option if less-invasive treatments are ineffective and when the ankle has been damaged, if there is arthritis, and if the patient suffers from pain and difficulty in walking.

RECOGNIZED FOR EXCELLENCE

Beebe Healthcare received 5-star ratings from Healthgrades® for Total Knee Replacement for 17 Years in a Row (2004–2020), and for Total Hip Replacement for four Years in a Row (2017–2020). Beebe was also a recipient of the Healthgrades 2020 Joint Replacement Excellence Award.

The Joint Commission has awarded Beebe Healthcare with a Certification for Hip and Knee Replacement Surgery programs and a Certification for Beebe's Spine Surgery program. These disease-specific certifications mean that both surgery programs have met the highest national standards and guidelines that can significantly improve outcomes for orthopaedic surgery patients.
