COVID - 19 Vaccination Consent & Administration Form

Name:		Date of Birth:
Address:		
Gender:	Race/Ethnicity:	Phone Number:
If you are insured, please list name of provider:	Plan Name: _____ Group ID: _____	Member ID: _____
<p>Please read the below statements carefully and initial for consent in the right-hand column. You must initial ALL statements if you are to receive the COVID-19 vaccination.</p>		Initials
<p>I reviewed the separate Emergency Use Authorization (EUA) document given to me and understand the risks and potential side effects identified during the trial of this vaccine that could occur if I receive the vaccine. I understand there are different brands of vaccine available and I am choosing to receive the brand offered today. I also know I have the option <u>not</u> to receive a Covid-19 vaccine.</p>		
<p>I have never had an allergic or anaphylactic reaction to a COVID-19 vaccine or polyethylene glycol (Pfizer, Moderna) or polysorbate (Johnson & Johnson/Janssen).</p>		
<ul style="list-style-type: none"> • I do not have known, active COVID-19 infection • In the past 90 days, I have not received monoclonal antibodies for COVID-19 		
<p>I have discussed any concerns regarding the COVID-19 Vaccine and any medical conditions I may have with my Healthcare Provider. I have either been advised by my Provider that I may proceed with the COVID-19 Vaccine OR, if my Provider has advised against receiving the COVID-19 Vaccine, I have taken the discussion into consideration and have decided to proceed with the COVID-19 Vaccine based on my own personal decision.</p>		
<p>I have read the separate CDC V-SafeSM document provided to me and I agree to report side effects to my Provider and/or the CDC via V-SafeSM. In the event of a medical emergency, I understand that I should call 911 for immediate medical intervention.</p>		
<p>I understand that the FDA has noted that some people have developed blood clots and low platelet levels after receiving the Johnson & Johnson/Janssen COVID-19 Vaccine; most people were females ages 18-49. The chance of this happening is remote. If I receive this vaccine, I will seek medical care immediately if I develop shortness of breath, chest pain, leg swelling, persistent abdominal pain, severe or persistent headaches or blurred vision, easy bruising or tiny blood spots under the skin.</p>		

I understand that Emergency Use Authorization (EUA) is a pathway to make unapproved medical products available during public health emergencies and **the COVID-19 Vaccine I will be receiving is not FDA approved.**

**COVID-19 VACCINE
FREQUENTLY ASKED
QUESTIONS**

Can the Pfizer/BioNTech, Moderna, or Johnson & Johnson/Janssen vaccine give me the COVID-19 infection?

NO. These vaccines do not contain any part of a live virus and **cannot** cause a COVID infection. These vaccines lead to the formation and expression of the spike protein of the COVID virus. These proteins fight off COVID-19 if exposed.

Can the Pfizer, Moderna, or Johnson & Johnson vaccine cause me to test positive for COVID-19?

The Pfizer, Moderna, and Johnson & Johnson vaccine can **NOT** cause you to test positive for an **antigen** or **PCR** test (nasal or throat test) for the COVID-19 virus. They can cause you to test positive for certain **blood antibody tests** for COVID-19. The purpose of the vaccine is to create antibodies (special proteins that fight infections) to help you fight off COVID-19 if exposed. If you have a nasal or throat swab that tests positive for COVID-19, it is because you have tested positive for the infection.

What if I have questions if the COVID-19 vaccine is right for me due to medical conditions or an illness?

Reach out to your primary care provider or specialist that treats these conditions for guidance and help. The vaccine clinic will not be able to provide you with specific decisions if this vaccine is right for you.

What if I am pregnant, attempting to conceive or breastfeeding and have questions if I should receive the COVID-19 vaccine?

Reach out to your primary care provider, pediatrician or obstetrics/gynecologist for additional information on your situation and the COVID vaccine. The vaccine clinic will not be able to provide you with specific decisions if this vaccine is right for you.

If I develop a potential side effect or adverse reaction to the COVID-19 vaccine, what should I do?

If you develop a severe, life threatening reaction to the COVID-19 (or any vaccine or medication) seek urgent medical attention immediately. If you develop side effects that require medical guidance but not immediate medical attention, we ask that you to reach out to your primary care provider for further guidance. If you are unable to contact your primary care provider, Beebe Walk-In Services are available for in person or TeleMedicine visits. Please visit <https://www.beebehealthcare.org> to schedule your appointment online or reserve your spot in line at any of our 4 locations for medical assistance. Beebe Walk-Ins are located in Georgetown, Millsboro, Millville and Rehoboth.

Can I become infected with COVID-19 after receiving my 1st or 2nd dose of the COVID vaccine?

YES. All the precautions that you have taken to remain safe before the 1st (or 2nd) dose of the COVID vaccine remain the same.

Continue the 3 Ws- [Wear a mask](#), [Watch your distance](#) and [Wash your hands \(frequently\)](#).

FOR PFIZER OR MODERNA VACCINE ONLY:

If I test positive for COVID-19 after receiving my 1st vaccine, can I receive my 2nd vaccine dose if one is indicated?

As long as you are feeling well at the time you are due for your 2nd vaccine dose, then yes, you should proceed with your 2nd dose on time. If you are not feeling well or have not recovered by the time you are scheduled for your 2nd dose, please contact your primary care provider to discuss your symptoms. Your doctor may want you to delay your second dose.

How will I get scheduled for my second COVID-19 vaccine ?

Once you receive your first COVID-19 vaccine, we will maintain a record of your first dose. As the window of opportunity opens for your second dose vaccine and vaccine supply is available, we will reach out to you and schedule you in for your second dose. If you have the opportunity to receive your second dose at another place or time, we understand. Please feel free to move forward with your second dose.

You may be scheduled for your 2nd vaccination at the time you receive your 1st vaccination. If you are unable to keep this appointment, need to reschedule, or did not receive an appointment for your 2nd dose, please call the COVID Line at 302-645-3200 for assistance.

Will I be protected from COVID-19 if I only receive the 1st vaccine dose?

Receiving the 1st dose of vaccine provides some protection from COVID-19 infection. It is important to remember that the vaccine has been created to decrease the chance of becoming severely ill if infected with COVID-19 and may not provide complete protection from becoming infected with COVID-19 (even after the vaccine series is completed).

FOR ALL COVID-19 VACCINES:

How can I obtain additional information about the Covid-19 Vaccine?

Contact the Delaware Division of Public Health Coronavirus Vaccine Call Center at 1-833-643-1715. The Call Center is open from 8:30am to 4:30pm Monday-Friday and 10:00am to 4:00pm on Saturday. You may also visit <https://coronavirus.delaware.gov/vaccine/> for more information.

**Get vaccinated.
Get your smartphone.
Get started with v-safe.**

What is v-safe?

V-safe is a smartphone-based tool that uses text messaging and web surveys to provide personalized health check-ins after you receive a COVID-19 vaccination. Through **v-safe**, you can quickly tell CDC if you have any side effects after getting the COVID-19 vaccine. Depending on your answers, someone from CDC may call to check on you. And **v-safe** will remind you to get your second COVID-19 vaccine dose if you need one.

Your participation in CDC's **v-safe** makes a difference—it helps keep COVID-19 vaccines safe.

How can I participate?

Once you get a COVID-19 vaccine, you can enroll in **v-safe** using your smartphone. Participation is voluntary and you can opt out at any time. You will receive text messages from **v-safe** around 2pm local time. To opt out, simply text "STOP" when **v-safe** sends you a text message. You can also start **v-safe** again by texting "START."

How long do v-safe check-ins last?

During the first week after you get your vaccine, **v-safe** will send you a text message each day to ask how you are doing. Then you will get check-in messages once a week for up to 5 weeks. The questions **v-safe** asks should take less than 5 minutes to answer. If you need a second dose of vaccine, **v-safe** will provide a new 6-week check-in process so you can share your second-dose vaccine experience as well. You'll also receive check-ins 3, 6, and 12 months after your final dose of vaccine.

Is my health information safe?

Yes. Your personal information in **v-safe** is protected so that it stays confidential and private.*

*To the extent **v-safe** uses existing information systems managed by CDC, FDA, and other federal agencies, the systems employ strict security measures appropriate for the data's level of sensitivity. These measures comply, where applicable, with the following federal laws, including the Privacy Act of 1974; standards enacted that are consistent with the Health Insurance Portability and Accountability Act of 1996 (HIPAA); the Federal Information Security Management Act, and the Freedom of Information Act.

Use your smartphone to tell CDC about any side effects after getting the COVID-19 vaccine. You'll also get reminders if you need a second vaccine dose.

How to register and use v-safe

You will need your smartphone and information about the COVID-19 vaccine you received. This information can be found on your vaccination record card; if you cannot find your card, please contact your healthcare provider.

Register

1. Go to the **v-safe** website using one of the two options below:

2. Read the instructions. Click **Get Started**.
3. Enter your name, mobile number, and other requested information. Click **Register**.
4. You will receive a text message with a verification code on your smartphone. Enter the code in **v-safe** and click **Verify**.
5. At the top of the screen, click **Enter your COVID-19 vaccine information**.
6. Select which COVID-19 vaccine you received (found on your vaccination record card; if you cannot find your card, please contact your healthcare provider). Then enter the date you were vaccinated. Click **Next**.
7. Review your vaccine information. If correct, click **Submit**. If not, click **Go Back**.
8. **Congrats! You're all set!** If you complete your registration before 2pm local time, **v-safe** will start your initial health check-in around 2pm that day. If you register after 2pm, **v-safe** will start your initial health check-in immediately after you register — just follow the instructions.

You will receive a reminder text message from **v-safe** when it's time for the next check-in — around 2pm local time. Just click the link in the text message to start the check-in.

Complete a v-safe health check-in

1. When you receive a **v-safe** check-in text message on your smartphone, click the link when ready.
2. Follow the instructions to complete the check-in.

Troubleshooting

How can I come back and finish a check-in later if I'm interrupted?

- Click the link in the text message reminder to restart and complete your check-in.

How do I update my vaccine information after my second COVID-19 vaccine dose?

- **V-safe** will automatically ask you to update your second dose information. Just follow the instructions.
